Perhaps the most renowned writer in the field of vocal pedagogy, Richard Miller has delivered a new and outstanding contribution to the study of vocal technique in Securing Baritone, Bass-Baritone, and Bass Voices. The first thorough and comprehensive treatment of low male voices, this book draws on techniques and practical advice from Miller's years of professional experience as a performer and pedagogue. With a unique focus on "securing" the technical stability of the male voice, the book offers practical advice to students, their teachers, and professional performers, through numerous practical exercises and repertoire suggestions appropriate to various stages of development. Miller synthesizes historic vocal pedagogy with the latest research on the singing voice, always emphasizing the special nature of the male voice and the proper physiological functioning for vocal proficiency. An indispensable guide to male low voices, this book is an essential text for performers, aspiring performers, and instructors alike.
